RENEWABLE ENERGY DEVICES LTD

Why RED?

Renewable Energy Devices Limited, aka RED, are manufacturers of ultra-high-efficiency Air Source Heat Pumps and associated technologies. RED's heat pumps are designed to heat your home or business as efficiently as possible, with efficiencies above 500%. This means that for every kilowatt of electricity consumed we can generate 5 kilowatts of heat from the air, with zero emissions at the point of use. Conceived, designed, and manufactured in Northern Ireland using innovative and patent-pending technology, RED is a local company with global ambitions.

THE BEST MONEY CAN BUY

A RED heating system is not just designed for any house, it's designed for YOUR HOUSE. A RED heat pump isn't a purchase, it's an investment
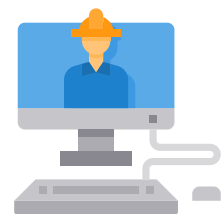

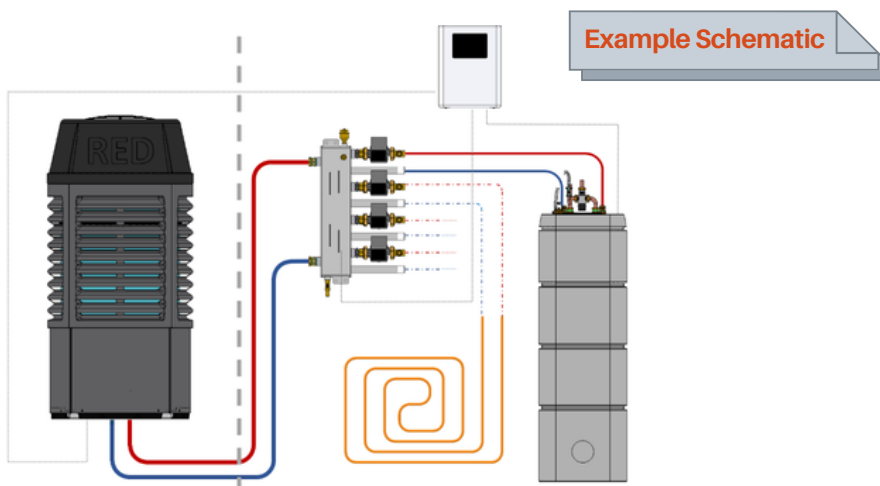

BY THE UK. FOR THE UK

RED heat pumps are designed, built and supported in the UK, using locally sourced components optimised for UK performance.

INTUITIVE CONTROLLER

Boasting an incredibly powerful yet intuitive interface, the RED heat pump system controller is unlike anything you will have experienced before

Example Schematic

ONLINE COMMISSIONING

With full setup & testing over the web, RED engineers will health check the system after 1 week and monthly thereafter to advise changes you can make to further increase efficiency.
